NGS Unique Dual Barcode Primer Kit for MGI, Set4 (Plate,289-384)

Cat.No.: HYD328

Product Description

NGS Unique Dual Barcode Primer Kit for MGI is a dedicated reagent kit designed for DNA library construction on the MGI high-throughput sequencing platform. It employs a dual-end adapter strategy and includes UDB Adapters and UDB Primers used in next-generation sequencing (NGS) library preparation. The kit is divided into four Sets (Set 1–4). Each Set contains 96 uniquely dual-barcoded UDB Primers, enabling the construction of up to 384 libraries with unique dual-index combinations when used together. This kit is compatible with MGI-compatible library preparation kits. All reagents provided in this kit have undergone rigorous quality control and functional validation to ensure maximum stability and reproducibility during library construction.

Components

Cat.No.	Components	96×1 T	96×2 T
HYD325	UDB Adapter	480 μL	960 μL
	UDB Primer 001-096	5 μL each	10 μL each
HYD326	UDB Adapter	480 μL	960 μL
	UDB Primer 097-192	5 μL each	10 μL each
HYD327	UDB Adapter	480 μL	960 μL
	UDB Primer 193-288	5 μL each	10 μL each
HYD328	UDB Adapter	480 μL	960 μL
	UDB Primer 289-384	5 μL each	10 μL each

Storage

Store at -25 ~ -15℃ for 2 years.

Notes

1. For your safety and health, wear a lab coat and disposable gloves during operation.
2. The concentration of UDB Adapter in this kit is 10 μM. The amount of adapter required per library should be adjusted according to the specific library prep kit used and the input amount of starting template.
3. The UDB Adapters provided are universal short adapters and require PCR amplification to generate complete sequencing libraries. The UDB Primers carry unique barcode sequences for sample identification during high-throughput sequencing. The concentration of UDB Primers is 10 μM.
4. The kit is divided into 4 Sets, each containing 96 uniquely dual-barcoded UDB Primers, allowing the construction of 384 uniquely dual-indexed libraries in total.
5. Do not heat the adapters. Allow them to thaw slowly at room temperature. The laboratory temperature should ideally be maintained at 20–25°C. Avoid repeated freeze-thaw cycles; aliquoting is recommended. Short-term storage at 4°C is acceptable.
6. The structure of sequencing libraries constructed using the NGS Unique Dual Barcode Primer Kit for MGI is as follows:

7. This product is for research use only.

Sequence information

1. UDB Adapter for MGI

5′-/5Phos/ AGTCGGAGGCCAAGCGGTCTTAGGAAGACAATCAG -3′

5′-TTGTCTTCCTAAGCAACTCCTTGGCTCACAGAACGACATGGCTACGATCCGACTT -3′

2. Barcode 2 Primer for MGI
